IsoMetrix Level 2 (Advanced User) Training Course

Course length:

The course is a one day course

Number of candidates:

A maximum of ten candidates can be accommodated per course

Candidate profile:

The IsoMetrix Advanced User Course covers the same introductory component as the User Course, however, is designed to train IsoMetrix users that will need to add and edit risks, conduct risk assessments, set targets and actions as well as manage other relevant information related to their area of responsibility.

Course overview:

- Introduction to management systems and IsoMetrix
- How to navigate around IsoMetrix and find information
- The concept of Risk Types / Disciplines in IsoMetrix and how to add and find information based on applicable Risk Types
- A detailed explanation of IsoMetrix as a tool to assist in the management of the components making up typical management systems including policy statements, legal requirements, risks, assessments, targets, stakeholders, non-conformance management, audits, inspections, meeting management and the action management programme.

Pre-requisite:

This course can only be taken upon completion of a basic computer training skills course.
