Your trusted partner in the journey to a sustainable tomorrow.

ISOMETRIX

Company Profile

Overview

IsoMetrix is one of the world's leading developers of software solutions for enterprise risk management. We provide integrated compliance and risk management solutions for **EHS and sustainability experts** who know what they want.

We're geared to serve organizations at a global and local level - we have offices in **Atlanta**, **Johannesburg**, **Toronto** and **Perth**. We also have implementation partners on four continents.

The growing demand for sustainability and integrated risk management

Large organizations are under pressure to manage issues of governance and sustainability in a more formal and integrated way. This is being driven by globally recognized codes, reports and organizations including:

- Cadbury Report
- Global Reporting Initiative for Sustainability (GRI)
- ASX's Corporate Governance Principles and Recommendations
- Sarbanes-Oxley Legislation (SOX)
- International Integrated Reporting Council (IIRC)
- International Organization for Standardization (ISO)

The market is evolving rapidly, with organizations replacing un-integrated point solutions and spreadsheets with centralized, enterprise-wide, integrated solutions that cover the full spectrum of risk disciplines. IsoMetrix is at the forefront of this evolution.

"The biggest impact that IsoMetrix has made on our company is trend analysis." Mirriam Tenyane, General Manager Risk & Safety at Transnet Engineering

Our culture

Good Business

At IsoMetrix, we believe that proper risk management provides **powerful and wide-reaching benefits**. It is good for our planet, and the people and communities we work and live with. It also leads to more profitable and resilient businesses.

IsoMetrix enables businesses to run sustainably. In helping our customers to do good, we also help them do well. Hence we're your **trusted partner** in the journey to a sustainable tomorrow.

Partnerships that Empower: Good business means all parties benefit. We believe in maintaining close and open relationships with our customers, suppliers and colleagues to ensure shared success.

The Possibility of a Better World: There is a growing consensus that all good businesses need to focus on reducing their impact on the planet. We need to do more to ensure that the bottom line of Profit is expanded into the triple bottom line: People, Planet and Prosperity. We are dedicated to doing all we can to help achieve long-term sustainability for all life on Earth.

Change for Good: We are passionate about environmental and social stewardship, and work with our customers to provide practical and sustainable risk management solutions that bring about real and lasting social and environmental change.

Our people are the key to our success

Innovation is an integral part of our company's values and our success to date. We place a huge emphasis on **Research and Development**, attracting the best and brightest minds into our team. We also partner with thought leaders in the advisory arenas of environment, sustainability and Governance, Risk and Compliance (GRC).

The result of this is a disruptive hyper-agile software platform that provides a fully integrated solution across a broad range of risk disciplines.

Right, first time

For large mature organizations, we have the expertise and proven ability to provide a fully tailored solution for **your unique processes**. From our extensive experience with mining and oil & gas, we've identified best practices and have **excellent out-of-the-box solutions** to get you started quickly. Companies who adopt these template solutions can look forward to rapid implementations at reduced costs.

With every implementation, we work closely with you to make sure you have the right solution, first time.

IsoMetrix suite of solutions

What makes IsoMetrix truly unique is our native integration around a central risk taxonomy or classification. We call this our **golden thread**. All related risks, controls, incidents and findings are automatically linked behind the scenes, providing a clear, unified view of risks across the organization. This visibility over inter-related risks is supported by the feedback loops that notify risk and control owners when incidents occur.

This is how IsoMetrix is able to replace multiple separate software platforms with a **single integrated solution** for the following:

	Health, Safety and Environment (EHS)
	Enterprise Risk Management (ERM)
	Social & Environmental Sustainability
	Governance & Ethics
	Quality Management
	Occupational Health & Hygiene
	Legal Register & Compliance
	Tailings Management
	Business Continuity Management

Long-term partnerships

The agile nature of the software also enables us to develop new functionality to meet on-going, **changing needs** in a rapid and cost-effective manner. This results in long-term partnerships with our customers.

An even greater benefit of our innovative technology is our ability to develop new solutions, modules and features far more rapidly than our competitors. This gives us a significant competitive edge and has allowed us to develop one of the **most comprehensive** and **user-friendly** suites of risk management software solutions in the market.

Industries we serve:

- Mining
- Oil and Gas
- Transport, logistics and heavy industry
- Financial services, telecommunications and service-based industries
- Other industries including food production, agriculture, waste management and facilities management.

Our customers

IsoMetrix specializes in providing solutions for large organizations that span multiple sites and countries.

Our customers face significant environmental, safety, health or social risks, in addition to typical corporate GRC issues.

Our customers include many of the world's largest mining and oil & gas groups. These customers generally have significant license-to-operate challenges, dictated by ever-increasing local and international legislation.

To find out how we've helped EHS, risk and sustainability experts like you implement a global unified solution, watch or read our customer testimonials at **isometrix.com/case-studies**.
