

Compliance and Permit Management Solutions for High-Risk Industries

Simplify Compliance,
Manage Permits,
and Reduce Risk
with Confidence

Evolving Compliance Complexity Demands Smarter Solutions

Organizations today are faced with a growing set of compliance regulations. These regulations materialize in many forms, be it laws, licenses, permits, or some other format.

Volumes of compliance obligations and conditions: regulations, permits, licenses, and agreements must be meticulously managed.

Compliance Obligation Dashboard

Compliance and permit management solutions centralize this complexity—streamlining workflows, automating monitoring, and providing real-time visibility into compliance performance to **avoid costly violations and operational disruptions.**

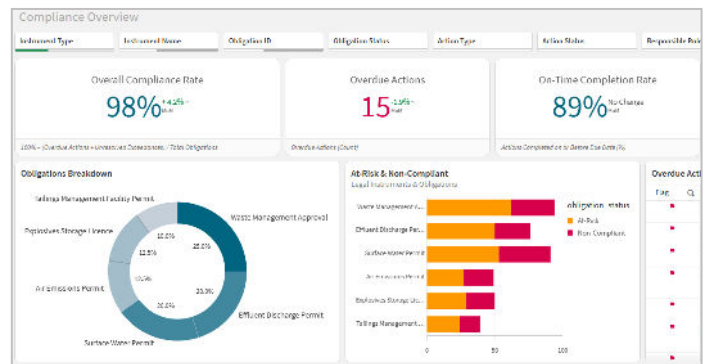

Core Capabilities to Master Compliance

Compliance Obligation Management:

Register and catalog all compliance sources including laws, licenses, permits, and stakeholder agreements.

Automate scheduling of compliance tasks, inspections, renewals, and reporting deadlines.

Centralize documentation and evidence for internal and external assurance.

Compliance Overview

Permit and Compliance Management:

Digitize permit creation, review, approval, and issuance workflows, including hot work, confined space, and environmental permits.

Integrate permit controls with risk assessment and control verification for safe task execution.

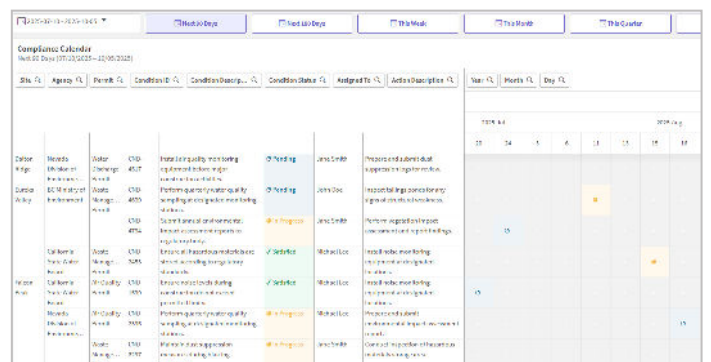

Permit Management Dashboard

Automated Compliance Calendar:

Map compliance obligations to operational risks and controls for holistic oversight.

Track compliance status, compliance tasks, and compliance gaps in real time.

Compliance Calendar

Key Benefits for Decision Makers

Enhance Regulatory Confidence

Avoid costly fines and shutdowns through timely, transparent compliance management.

Improve Visibility

Gain enterprise-wide insight into compliance status, risks, and permit workflows on intuitive dashboards.

Build Stakeholder Trust

Demonstrate reliable compliance to regulators, partners, and communities.

Increase Efficiency

Automate administrative tasks to reduce workload on compliance teams by up to 50%.

Visualize Permit Mapping

Integrate GIS and mapping to link permits directly to land areas, giving clear visibility of which conditions apply to specific locations.

Support Safer Operations

Ensure only authorized and risk-assessed activities proceed under permit systems.

Technology Built for Your Challenges

Cloud based solution,
scalable deployment
worldwide.

Seamless integrations
with ERP, GIS and
document management
systems.

Mobile App for field
inspections, compliance
monitoring, and task
management.

Role-based access
controls ensuring data
security and audit
trails.

“ We consolidated thousands of regulatory requirements into a single system, **cutting compliance administration time by 40%** and improving audit preparedness.
